FOR PRODUCT NEWS SECTION

Automated Biological Specimen Prep 5X-10X Faster

Microscopy Innovations introduces next generation automated biological specimen preparation with the mPrep ASP-2000™. In addition to walk-away convenience, one-touch sample handling, minimal reagent use, and reproducibility of results, the ASP-2000 incorporates thermal control for precise reagent temperature monitoring. The mPrep ASP reduces processing time, for example kidney samples process in ~45 minutes, with no reduction in quality. Accelerate your TEM, SEM, 3DEM, and immunogold labeling sample prep! Visit our website for technical resources.
